

NOTES ON THE STAFF

How do I find my hand position?

1. Starting with either hand, identify your starting note. (see above if you need help)
2. Identify what finger the music says to place on this note. (use finger numbers)
3. Place that finger on the starting note, then let all other fingers find their notes around that starting note.
4. Repeat for the other hand.
5. There's your starting hand position!

FINGER NUMBERS

Note: right hand is not *always* in treble clef, and left hand is not *always* in bass clef, but this is often how you will see it, and it's a good place to start.

If the music requires something different, it will say so!
